

311 S. Wacker Drive

Chicago, Illinois

Client

Insignia/ESG

Completion Date

December 2003

Services Provided

Peer Review of Façade Examination
and Repairs

Completed in 1990, this 65-story granite, concrete-framed building, designed by Kohn Pedersen Fox Associates, is a prominent figure on Chicago's skyline.

Others conducted a critical examination in accordance with the City of Chicago Exterior Wall Ordinance on this structure. Thornton Tomasetti was retained to perform a peer review of the critical examination and ongoing repair documentation. Challenges included analysis of complex procedures due to the size and attachment of the cladding panels.
