

The New York State Center of Excellence in Bioinformatics & Life Sciences (COE)

The State University of New York, Buffalo, New York

Client/Architect

Francis Cauffman Foley Hoffmann
Architects, LLC

Completion Date

2005

Construction Cost

\$140 million

Total Area

400,000 sf

The new \$140 million, 400,000-square-foot, state-of-the-art Life Sciences Complex was constructed on the Buffalo Niagara Medical Campus. The complex houses life-sciences research designed to improve human health by developing new therapies to treat and cure disease. The buildings have masonry walls with punched windows and curtain wall, metal panels with strip windows and sky lights.

Thornton Tomasetti provided curtain wall consulting services to the architect including review of the exterior walls, roofing and waterproofing, and review of shop drawings and specifications. Additionally, we witnessed the air and water tests and provided quality control during construction.
