

# Miller Park Investigation

Milwaukee, Wisconsin

**Client/Owner**

Southeast Wisconsin Professional  
Baseball Park District and The  
Milwaukee Brewers

Thornton Tomasetti provided emergency response services and conducted a structural failure investigation and collapse analysis of a 500-foot tall mobile crane that collapsed onto the seating bowl of Miller Park (Milwaukee Brewers' baseball stadium) during its construction. Thornton Tomasetti personnel remained on-site for approximately five months performing stabilization and damage assessment services. In addition, an exhaustive structural investigation was performed including three-dimensional finite element analyses (linear, non-linear, and dynamic).
